**Then
Bismarck is for you!**

With a population of 68,000, the City of Bismarck is seeking a **Design/Construction Engineer** to work under the direction of the City Engineer.

Responsibilities and Goals:

The Design/Construction engineer performs supervisory, administrative, and technical work assisting in directing the engineering operation of the City. Work involves engineering duties either in planning, design, or construction phases of City Public Works projects to insure conformity with specifications. Supervision and design of Public Works improvement projects; prepare and update construction specifications and city maps; coordinate design projects with developers and other government agencies. Prepare construction cost estimates, call for contractor bids, and advises on award of contracts. Assist City Engineer in master planning of Public Works improvements such as arterial streets, water main and sewer main truck lines, storm sewer truck lines, or drainage channels, water reservoirs and pumping stations, sanitary sewer lift stations, and land use.

Minimum Qualifications

Qualified applicants will have a Bachelor's degree in civil engineering and considerable experience in civil engineering, including two years in a supervisory or an administrative capacity or any equivalent combination of education and experience. Valid Class D driver's license. Registration as a Professional Engineer (PE) in the State of North Dakota or ability to attain prior to starting.

Full Salary Range: \$64,502 - \$96,753. **Anticipated Hiring Range:** \$64,502-\$72,565 (doe)
Posting closes July 31, 2015 or until filled.
